SUMMARY

Business Management & Cybersecurity Master's student with hands-on experience in compliance and regulatory training, policy and controls documentation, and monitoring flagged activity through checks and assessments of system alerts. Particular strength in process automation and AI-driven workflows, applied with a focus on ethical and responsible AI. Fluent in English (C1), conversational German (A2), and confident across Microsoft tools including Copilot, Excel and PowerPoint. Seeking a Working Student role in Global Compliance to support monitoring, ongoing projects and digitalisation initiatives, and keen to build financial-services and securities knowledge within a conduct-and-ethics compliance team.

SKILLS

Compliance, Governance & Ethics: policy & procedure documentation, Code of Conduct / acceptable-use training, controls monitoring, audit support, regulatory & compliance training; frameworks incl. GDPR, DORA, NIS2, ISO 27001, NIST CSF
Monitoring & Investigations: reviewing system flags and alerts, checks and assessments, anomaly detection, case documentation, remediation tracking, follow-up communication
Process Automation & Responsible AI: Python, PowerShell, workflow automation, AI-driven alert triage and risk scoring, Microsoft Copilot; awareness of the EU AI Act and ethical / responsible AI practices
Tools: MS Excel, MS PowerPoint, MS Office, SQL
Strengths: discretion with sensitive information, attention to detail, clear written and verbal communication

EXPERIENCE

NIIT Foundation

Cybersecurity Trainer

Apr 2025 – Oct 2025

Ahmedabad, India

- Delivered compliance and policy training to 150+ staff on acceptable-use and access-control requirements, with 95% achieving certification, building day-to-day adherence to governance and Code-of-Conduct-style policies.
- Maintained policy, training and controls documentation in the LMS, keeping records current and audit-ready for review.
- Created awareness content mapped to recognised standards (ISO 27001, NIST CSF), helping non-specialist staff understand and follow compliance requirements.

The CyberDiplomat

Cybersecurity Research Analyst

Jul 2023 – Mar 2024

Bengaluru, India

- Monitored activity across 50+ platforms, performing checks and assessments of flags and alerts and escalating policy and access exceptions for review.
- Tracked each remediation item to closure on schedule and documented outcomes and follow-up communication.
- Supported case documentation and ongoing team projects, and tested new tools to improve process efficiency and digitalisation.

PROJECTS

AI-Assisted Monitoring & Automation | *Python, AI Platform API, REST API*

- Built an AI-assisted workflow that monitored simulated activity and flagged exceptions using a Python anomaly-detection script, modelling how routine monitoring checks can be automated.
- Integrated an AI platform via API to triage flags, score risk and map cases to playbook logic, producing response recommendations as a working model for AI-driven, responsible process enhancement in a compliance context.

Monitoring & Detection Homelab | *Wazuh, Ubuntu, Windows*

- Deployed a centralised monitoring platform and onboarded a host for log collection and real-time alerting, building hands-on experience reviewing and triaging alerts.
- Configured integrity monitoring to detect 100+ unauthorised changes and worked them from a central dashboard, practising checks, assessments and case follow-up.

EDUCATION

GISMA University of Applied Sciences

MSc, Business Management & Cybersecurity

Sep 2025 – Expected Oct 2026

Potsdam, Germany

Swarnim Startup and Innovation University

B.Tech, Information Technology — GPA 8.76/10 (German equivalent 1.6)

Aug 2020 – Jun 2024

Gandhinagar, India

CERTIFICATIONS

Microsoft SC-900; ISO/IEC 27001 Information Security Associate; Google Cybersecurity Certificate; Cisco CyberOps Associate; Certified GRC & Threat Intelligence Analyst; Microsoft SC-300 (in progress); CompTIA Security+ SY0-701 (in progress.)
Languages: English (C1) | German (A2)
